

**Information meeting on Industrial Waste Mapping (IWM) for enterprises
from the Davydiv Village Territorial Community
Within the “Circular Economy and New Growth Opportunities” Component of
the EU-funded “EU4Environment” Action in Ukraine**

Agenda

REGISTRATION LINK

Date: November, 18, 2021

Time: 2:00 PM - 3:30 PM (EET),

Format: web-based video conference via Zoom

Language: Ukrainian and English (with simultaneous interpretation)

Action implemented by:

AGENDA

Moderator: Mr. Volodymyr Popovych, Coordinator in West region, Resource Efficient and Cleaner Production Centre

Time (EET)	Item
14:00-14:15	Welcoming remarks Representative of the Davydiv VTC (tbc) Ms. Tatiana Chernyavskaya, EU4Environment Project Manager, Directorate for Environment and Energy, United Nations Industrial Development Organization (UNIDO) Mr. Andrii Vorfolomeiev, Director, Resource Efficient and Cleaner Production Centre
14:15-14:25	The RECPC's activities on waste mapping: data collection Mr. Volodymyr Popovych, Coordinator in West region, Resource Efficient and Cleaner Production Centre
14:25-14:55	Analysing the collected data for waste mapping: preliminary results, benefits and opportunities for manufacturing enterprises of the Davydiv VTC Ms. Emma Danielsson, Senior Consultant, Sweco Sweden
14:55-15:30	Discussions, Questions and Answers (Q&A) session (all participants)
15:30-15:35	Closing remarks

Practical Information

The event will be organized on 18 November 2021 (14:00 - 15:30 (Kyiv time, EET)). The event will be delivered online using the Zoom platform. It will include presentations and discussion with participants. The event will be hosted in both Ukrainian and English, and simultaneous interpretation will be provided.

The interested participants should register in advance in order to participate in the meeting.

To join the meeting, please use the following link:

Meeting ID: 945 2999 3108

Passcode: 630594

Event objectives

This event focuses on the following key objectives:

- present the results of industrial waste management activities to the representatives of the Davydiv VTC;
- discuss the preliminary results from waste mapping activities to refine findings and reach the final results;
- discuss the benefits and new opportunities related to waste mapping for the manufacturing enterprises of the Davydiv VTC.

Participants

The participants list consists of representatives from the Davydiv Village Territorial Community, industrial enterprises, local authorities and agencies, and ecologists as well as UNIDO and Sweco,.

The organizers of this event are the Resource Efficient and Cleaner Production Centre.

Background

The information meeting on waste mapping is held within the framework of the “Circular Economy and New Growth Opportunities” Component of the EU-funded “EU4Environment” Action. The purpose is to present the preliminary results of industrial waste management and waste mapping activities, to give the representatives of the enterprises from the Davydiv Village Territorial Community (Davydiv VTC) the opportunity to comment, and to develop further plans and finalise results.

Waste management includes the activities and actions required to manage waste from its generation to its final disposal. This includes the collection, transport, treatment and disposal of waste, together with the monitoring and regulation of the waste management process and waste-related laws, technologies, and economic mechanisms.

An efficient waste management system creates an increased business value. This contributes to the sustainability of manufacturing industries and the promotion of economic opportunities.

The overall objective of waste mapping is then to identify, assess, and map waste streams of manufacturing enterprises in order to develop options for improving resource efficiency.

In Ukraine, the Resource Efficient and Cleaner Production Centre is the national partner of UNIDO in implementing the “Circular Economy and New Growth Opportunities” Component of the “EU4Environment” Action, covering three core thematic areas:

- Resource efficient and cleaner production (RECP)
- Circular economy (CE) and industrial waste management (IWM)
- Single market for green products (SMGP)

About EU4Environment Action

The “European Union for Environment” (EU4Environment) Action aims to help the six partner countries: Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova, and Ukraine preserve their natural capital and increase people's environmental well-being by supporting environment-related action, demonstrating and unlocking opportunities for greener growth, and setting mechanisms to better manage environmental risks and impacts.

The Action is funded by the European Union and implemented by five partner organisations: OECD, UNECE, UNEP, UNIDO and the World Bank, based on a budget of some EUR 20 million.
